SUMMARY

IT professional with hands-on roots in system administration and network infrastructure (U.S. Marine Corps: virtualization, Active Directory, Cisco telephony) and 8+ years in enterprise IT operations at The Walt Disney Company, now shifting focus toward software development, applied AI, and automation. Outside of core role, designs and ships full-stack production applications: a Supabase-backed esports league platform with a full test suite and CI/CD pipeline, a QR ordering and loyalty app for cafes, and a field-service dispatch SaaS MVP. Currently completing an AS in Cybersecurity.

TECHNICAL PROJECTS

Serpent Ascension League - Full-Stack Esports Platform

2024 - Present

Personal project, live production platform (sal-draft-league.vercel.app)

- Built and maintain a Next.js/TypeScript platform on Supabase (PostgreSQL, RLS, Realtime) with Discord OAuth for admin and captain sessions; 241 commits and counting.
- Own a full test pyramid: 103 unit tests (Vitest), Playwright E2E, RLS integration tests, and load tests, wired into a GitHub Actions CI pipeline on every push.
- Built the admin panel: live draft rooms, a standings engine, CSV bulk import, and a markdown announcements CMS.

BrewLoop - QR Ordering and Loyalty Platform

2025 - Present

Personal project, live pilot with an independent cafe (Black Rabbit)

- Built a QR-to-web ordering and loyalty app: public menu, mobile ordering, staff order queue, and owner dashboard, backed by Supabase (RLS, Realtime) and Square payments.
- Documented architecture decisions with ADRs and shipped a credential-free demo mode so the pilot cafe could test the full UI before backend setup.

SwiftDispatch - Field-Service Dispatch SaaS MVP

2025 - Present

Personal project, live at swiftdispatch.app

- Built a dispatch and quoting MVP for HVAC companies: quote builder with line-items and accept flow, Kanban job board, and an ROI simulator for sales conversations.
- Next.js/TypeScript with a Supabase backend and Twilio SMS for dispatch notifications.

Additional Projects

- Herson RAG Assistant: retrieval-augmented Civ6 game assistant running on a local LLM, fed by a custom pipeline that transcribes, translates, and organizes source video content (MVP stage).
- Modernized outdated legacy websites for two local small businesses (Toxic Ink Studios, McGraw Made Studio) on Next.js/Vercel.

EXPERIENCE

HyperCare Operations Analyst

Sep 2022 - Present

The Walt Disney Company - Enterprise Technology Operations Center

- Drive adoption of service management tooling (ServiceNow, Smartsheet) across ITIL disciplines: Incident, Change, Problem, and Configuration Management.
- Orchestrate HyperCare readiness planning for major enterprise events, coordinating cross-functional technical teams.
- Serve as liaison to executive leadership on service impacts and readiness metrics.

Technical Operations Center Analyst

Sep 2021 - Sep 2022

The Walt Disney Company - Disney Technology Operations Center (DTOC)

- Led real-time incident response for critical infrastructure, monitoring key applications and escalating per established protocols.
- Performed connectivity and functionality checks across VMware, vSphere, and Active Directory environments.
- Coordinated cross-functional teams during high-severity incidents to restore service and minimize downtime.

Senior System Administrator

Jan 2019 - Aug 2021

United States Marine Corps

- Consulted with users and engineers on system modifications and technology upgrades; managed day-to-day server environments.
- Diagnosed and resolved hardware and software issues; trained 3 network administrators and 2 data systems administrators.
- Implemented security protocols across networks, maintaining zero security breaches during tenure.

Junior System Administrator / Data Systems Technician

Jan 2017 - Jan 2019

United States Marine Corps

- Supported 23 units in field deployments; implemented secure telephony systems including Cisco Unified Call Manager (CUCM).
- Built and deployed virtualized Exchange and SQL servers; trained junior administrators in VMware and vSphere deployment.
- Troubleshot Active Directory, Windows Server, and cybersecurity issues in tactical field environments.

EDUCATION AND CERTIFICATIONS

Associate of Science, Cybersecurity

In Progress

Lake-Sumter State College

Frontend Simplified (FES Institute) - Software Engineering Program

In Progress

12-week applied coursework: JavaScript, React, and modern frontend development

ITIL 4 Foundations

Axelos Global Best Practice

SKILLS

Programming and Web: Python, JavaScript, TypeScript, Next.js, React, Tailwind CSS

Backend and Data: Supabase, PostgreSQL, Prisma, Row-Level Security, RAG pipelines, local LLMs

Integrations: Twilio, Square, Discord OAuth/API

Testing and DevOps: Vitest, Playwright, GitHub Actions CI/CD, Git/GitHub, Vercel, Railway

IT Systems and Operations: VMware, vSphere, Active Directory, Windows Server, Cisco (CUCM), Exchange, SQL, ITIL 4, ServiceNow, Smartsheet
